## Troubleshooting For Cutter Jam

1. When cutter jam occurs, do not press the cover open button to avoid damaging the blade.
2. Fix the printer by one hand and press either side of the convex bars by the other hand. Push up and open the front cover.

3. Please rotate the gear until the blade returns to its normal position, as shown in Figure 2.

When cutter jam occurs, the cutter does not retreat back and can be seen.

Figure 1

Cutter retreats back totally and cannot be seen.
